

## Selection of a Research Advisor

A research group is joined upon mutual agreement by the graduate student and faculty member. Any student in the Department of Chemistry can be mentored by any full-time faculty member in the Department of Chemistry. If you are interested in working with a research advisor outside of the Department of Chemistry, please talk to Student Services. **A different form is required.**

**Key dates:** This form may be completed any time after the earliest group join date in November (see rotation schedule for details). The last possible date for students to join a group is the end of the Spring semester. Please contact Student Services or the Director of Graduate Studies with questions or concerns.

**Instructions:** (1) Student completes and signs the first section of the form and sends to faculty member, (2) faculty completes and signs the second section of the form and sends to Student Services. Mentors and mentees should discuss expectations ahead of time.

### Graduate Student

Name: \_\_\_\_\_

PID: \_\_\_\_\_

☐ I attest that I was a good faith participant in the rotations program, or I received an exemption from the Director of Graduate Studies

Signature: \_\_\_\_\_

### Faculty Member

Name: \_\_\_\_\_

☐ I agree to accept the above-named student into my research group.

Signature: \_\_\_\_\_

**Upon completion, return via email to Student Services, [chemgs@unc.edu](mailto:chemgs@unc.edu)**
